

THE SOCIALIST LEADER WITH A CULT FOLLOWING!

WHAT COULD A POST ELECTION NZ LOOK LIKE?

APOSTLE BISHOP
BRIAN TAMAKI

OPINION PIECE

14TH OCTOBER 2020

BISHOP BRIAN TAMAKI

Kiwis are entering into dangerous, shark-infested waters if they are naive enough to give Labour complete control after this election. As the saying goes 'Absolute Power corrupts absolutely'.

THE LIBERAL LAW EXPLOSION

If this government has their way, this next term will see the following become law, plus many more undercover plans they have afoot:

- The End of Life Choice Act will come into effect allowing assisted suicide
- The recreational use of cannabis will become legal, opening the gateway to the Drug Foundation's ultimate agenda to see ALL drugs legalised in New Zealand, including meth.
- Hate Speech laws will be inflicted on the public, restricting our ability to speak up against the government and powers of the day as they '*prohibit speech that is likely to incite others to feel hostility or contempt*'
- The Contraception, Sterilisation, and Abortion (Safe Areas) Amendment Bill will be passed enforcing Safe Areas around Abortion clinics and prohibiting passive forms of protest such as prayer.
- Labour's Rainbow policy will be passed, introducing gender-neutral bathrooms into our schools and more
- More and more laws will be railroaded through parliament with little to no consideration for public submissions or due process like we've seen under the cover of COVID.

THE CULTURE OF DEATH

The government's creation of a culture of death within our politics will mean it is now legal in this country to:

- Kill our Babies (Abortion up to full term)
- Kill our Brain cells (Cannabis)
- Kill our Bed-ridden (Euthanasia)
- Kill our Basic rights and freedoms (COVID-19 Health Response Bill/Social Media Takedown Bill)

THE OUTCOMES OF A NEW SOCIALIST STATE

Take a moment to consider what New Zealand could look like after another three years under the tyranny of Labour if they receive absolute power. There is no way to really sugarcoat it, but it is conceivable that we will see:

- The beginnings of a real Socialist State within New Zealand, and destruction of the Kiwi Way of Life that we know and love

- The divide between the Rich and Poor will become greater in NZ. Even the WHO is predicting that due to harsh lockdowns worldwide poverty will now double within the next year with the poor becoming even poorer.
- The rise of super-gangs and organised crime as they battle it out for the monopoly in the new legalised drug economy, ushered in by these proposed drug reforms, amongst a new class of poor
- Employers in workplaces will face horrendous OSH issues, with a greater need to drug test employees, all while trying to navigate the complexities of employee rights who are engaging in the new legalised recreational cannabis use.
- Mental health issues will sky-rocket, further accelerated through cannabis being more widely available
- An exodus of skilled medical professionals from our health system, who took an oath to first do no harm, to alleviate suffering and to save lives. Those who can not execute the new death laws with a clear conscience will leave the profession in droves. This will leave New Zealand vulnerable for future pandemics when they hit our shores.
- Elder abuse will take on a new face with more elderly terminated by way of assisted suicide. This great wisdom resource from our seniors will be lost to our country for good.
- The equalization of the poor/unemployed and the wealthy/rich to a universal wage and living levels. Rewarding laziness with benefits and punishing the hard-working with taxes.

THE GREAT SELL-OFF OF OUR COUNTRY

Labour have made it their business to sell-off our country down the river. They have:

Sold off the Kiwi Way of Life (our culture) with high immigration and multi-culturalism

Sold off our Jobs, Houses and land to immigrants and foreign investors

Sold off Māori by denying Mana Motuhake

Sold off our founding religion to foreign religions who are now the fastest growing religions in the country

Sold off our Māori and Kiwi land into other hands

Sold off our water to China

And now they are ready to sell us down the river, through socialism

Labour's track record indicates we'll also see more of the following:

- Prepare for the biggest Sell-Off in New Zealand's history. We will see more and more of our Kiwi resources and innovations sold off to foreign investors under Labour's new policy...the **Investment Attraction Strategy** to encourage targeted and high-value international investment into New Zealand.
- Labour's open borders philosophy will once again see New Zealand flooded with immigrants and refugees robbing Kiwis of housing, jobs and business opportunities in their own country
- As more and more of our country become state dependant on wage subsidies, food parcels, benefits and more, the drive and motivation within Kiwis will dissipate, reducing our national productivity
- There will be a lot more job lay-offs as businesses are hit hard by increasing costs from potential new public holidays, more sick leave entitlements, increasing living wage/minimum wage rates, gender equality grievances, increasing compliance costs, increasing tax commitments, exporting challenges and a floundering economy. Not to mention uncertainty from pending and looming new lockdowns.
- The New Zealand economy could potentially tank and we enter into a deep recession with an inexperienced government at the helm who love to spend, spend, spend (buying votes) with no regard for tomorrow and the cumbersome debt they are lumbering future generations with, as they have no plan to navigate through these perilous times
- Our farming sector will continue to feel victimised by this government, increasing suicides and financial pressure amongst our farming community under the weight of burdensome compliance

THE GREAT ROBBERY

However, the greatest robbery is the loosing of the value of family! This government is anti-family.

The eroding of the cornerstone of the family has been well underway by this government. The first place of instruction is the home. Everything starts and finishes with a healthy home. However, it is a fact that the greatest problem we have as a nation is family breakdown. This alone is the single largest cause to the present social holocaust of soaring suicide rates, unacceptable child poverty, out of control domestic violence, and mental illness the like of which has never been known before in everyday Kiwis. The pressure of lockdowns, uncertainty, and unbridled fear on the population, has yet to fully vent its self on a country that is ill-prepared for an even greater plague of personal family destruction.

The biggest need in this day and hour is not more wage subsidies, industry, economy, or business....instead what is needed is hope and healing for the social carnage, as the strength of any nation lies in healthy families.

This is where Vision New Zealand comes into their own – a new party on the rise that has the teeth and fire for the future of a better New Zealand, that The National Party and all other political parties lack. Vision New Zealand's leader and team have a proven track record, through ManUp & Legacy and associated programmes, to heal, restore, and reset broken families, so that they become productive, whole and positive contributors to society.

It is not too late New Zealand to stop the advancement of this liberal Labour government in its tracks. Be wise with your vote this election, and vote NO TO SOCIALISM AND LIBERALISM, and vote YES TO PROTECTING OUR KIWI WAY OF LIFE.
